IA03: Use-Case-to-Story Traceability Card

Client/domn: Brny Bites, restaurant online ordering · **Date:** 23 October 2026 ***Use-case card***

Field	**Content**
Use case name	Place a pickup or delivery order
Actor	Logged-in customer
Goal	Order food and choose pickup or delivery and a payment method
Trigger	Customer presses "Continue to checkout" with items in the cart
Preconditions	Customer is logged in; cart has at least one avlable item
Mn success flow	1. System shows order summary with prices from the database. 2. Customer chooses pickup or delivery. 3. (Delivery) customer enters address. 4. Customer optionally picks a future time. 5. Customer picks payment m d Pl d 6 S lid CSRF k i h k k d ll i 7 S and presses Place order. 6. System validates CSRF token, one-time checkout token and all inputs. 7. System s the order, items and a pending payment in one transaction. 8. System empties the cart and shows "Order recei with the order number.
Alternate flows	2a. Pickup chosen : no address needed. 4a. No schedule order is for now. 5a. Some items became unavlable - system removes them and asks customer to review.
Exception flows	3a. Delivery with empty address → "Enter a delivery address.", nothing saved. 4b. Time in past or malformed error shown. 6a. Duplicate submit → second rejected by stale token. 7a. DB error → rollback, "We could not the order", cart kept.
Postconditions (success)	One order, its lines and one pending payment exist; cart is empty.
Postconditions (flure)	Nothing saved; cart kept; customer can retry.

Story and acceptance criteria

Story: As a customer, I want to place a pickup or delivery order online, so that I get my food without calling or visiting the shop first.

- **AC1 (success):** Given a logged-in customer with 2 × Check Check (GH₵35) and 1 × Soft Drink (GH₵8) in the cart, when they choose Pickup and Cash and press Place order, then one order with total GH₵78.00 and status received is saved and the page shows "Order received" with the order number.
- **AC2 (error):** Given Delivery chosen, when address is empty, then no order is saved and "Enter a delivery address." is shown.
- **AC3 (duplicate):** Given the order was already placed, when the same form is submitted agn, then no second order is created.

NFR - Reliability/data integrity: Submitting the same checkout twice creates exactly one order, and a flure partway through saves nothing. Verified by tests TC-18 (double submit) and the transaction rollback path.
